## DERMAL FILLERS

Revanesse & Redexis family of products incorporates the latest advancements in cross-linking technology, resulting in high quality, safe and long lasting dermal fillers.

### REVANESSE PURE

This Mesotherapy product is very versatile - face, neck, décolleté and hands. The client will benefit from the moisturising and anti-ageing benefits of this non cross-linked Hyaluronic acid.

### REVANESSE

For treatment of fine lines and superficial wrinkles (crows' feet, forehead wrinkles, glabellar lines...). Average duration 6 months.

### REVANESSE ULTRA

A high viscosity, Grade 3 Hyaluronic acid gel. Longer lasting effects (9 -12 months on average) for deeper wrinkles and folds. Perfect for adding immediate volume.

### REVANESSE LIPS

Specifically engineered for lip augmentation and definition. Compared to other leading products shows minimum swelling. A subtle, natural look for the lips lasting 6 - 9 months on average.

### REVANESSE CONTOUR

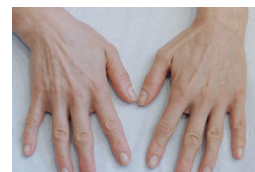

Revanesse Contour is a fully absorbable, high viscosity, clear Hyaluronic acid gel specifically formulated for face shaping and volumising.

### REDEXIS

Unique product with cross-linked Hyaluronic acid with positively charged Dextranomer beads to stimulate a new collagen formation for long lasting results (18 months on average). Designed to treat deep lines and folds.

BEFORE

AFTER

Patient treated with 1 ml of Redexis in each hand. Three treatments in total.

### REDEXIS ULTRA

Optimal for shaping and facial contouring with results expected to last up to 24 months. An increased amount of Dextranomer beads ensures maximum collagen production.

## Safe & Effective

Revanesse & Redexis line of dermal fillers is completely free of all animal products, thus reducing the risk of an immunogenic reaction. The Hyaluronic acid utilized in Revanesse & Redexis is naturally integrated into the tissue keeping the skin looking healthy and natural.

Please be aware that all injectables may result in bruising and / or swelling, which may last up to several days. If you have had injectables previously without incident this does not mean you will not have an incident as described above.

It is an established fact that all injectables carry the risk of bruising and / or swelling.
